

KHALID JALADIAN

BUSINESS SYSTEMS & OPERATIONS SPECIALIST

Jakarta, Indonesia | khalid.g.clear@gmail.com | +62 811 9119 288 | [LinkedIn](#) | [Portfolio](#)

PROFILE

I build the internal systems that help growing businesses operate like larger organizations—production ERPs, finance workflows, forecasting engines, and reporting infrastructure built on Google Sheets, Apps Script, and Looker Studio. Across multiple companies, I've transformed spreadsheet-based processes into scalable operational systems supporting inventory management, production planning, finance operations, and business reporting. While my formal roles have ranged from Audio Engineering to Talent Management, the consistent thread throughout my career has been a strong interest in data, systems, and operational improvement. Today, I sit at the intersection of business operations, analytics, and automation—translating operational challenges into practical systems that help teams make better decisions and work more efficiently.

EXPERIENCE

Freelance Systems Consultant — Star N Hero

May 2026 — Present

(freelance engagement — production ERP & forecasting system, built from scratch)

- Designed and built a custom Production ERP platform integrating inventory management, purchasing, material allocation, production planning, MRP, demand forecasting, and executive dashboards for an apparel business managing 130+ SKUs and over Rp178 million in tracked sales data.
- Developed a 17-sheet ERP architecture covering BOM management, inventory allocation, purchasing, production planning, material requirement planning (MRP), and forecasting.
- Built inventory intelligence and demand forecasting models generating production recommendations and inventory health analysis.
- Created executive dashboards supporting operational and inventory decision-making.
- Supported daily operations for 3 active users across production and inventory management functions.

Talent Manager — Vindes Corp

Jan 2024 — Present

(scope expanded into systems & automation)

- Designed and built internal business systems supporting 4 business units across project management, finance operations, performance analytics, and executive decision-making.
- Developed a centralized operational platform managing approximately 10–15 projects and 10–15 invoices per month, replacing fragmented workflows with integrated project, client, and financial tracking.
- Built a relational business operations system covering client onboarding, project approvals, invoicing, payment reconciliation, and operational reporting.
- Automated document generation, client deduplication, tax calculations, Drive routing, and Gmail-based notifications using Google Apps Script, reducing manual administrative workload.
- Designed and maintained executive dashboards covering revenue performance, sales pipelines, program analytics, digital performance, talent contribution, profitability, and financial operations across 4 business units.
- Developed automated reporting and KPI tracking systems covering sales, digital performance, YouTube program analytics, financial operations, and talent management using Google Sheets, Looker Studio, Apps Script, and external APIs.

Data & Business Analyst — Soulmate Bedsheet**Jan 2023 — Present**

- Designed and developed production workflow tracking systems supporting approximately 2,000 customer orders per month across a catalog of 2,299 product variations.
- Built a production workflow platform automating order movement across multiple operational stages and eliminating repetitive manual tracking.
- Developed operational dashboards and reporting tools enabling real-time visibility into production progress and fulfillment activities.
- Identified workflow bottlenecks through data analysis and implemented process improvements supporting operational efficiency.

Associate Audio Engineer — Tokopedia**Aug 2022 — Dec 2022**

- Managed live streaming operations for Tokopedia Play (OBS) and mixed/mastered audio for cross-platform content (TVC, YouTube, Instagram), including voice-over and vocal work for a jingle featuring BTS.

Head of Audio — Indomusikgram**Jun 2021 — Aug 2022**

- Supervised the audio team and project delivery; produced and mixed live performance content for social media, and created background music for the NFT project “Etherwaifu.”

Audio Engineer — Charprod**Dec 2017 — May 2021**

- Selected music, performed voice-overs, and mixed/mastered corporate video audio content.

TOOLKIT

AUTOMATION

Google Apps Script · onEdit/onOpen triggers · custom HTML sidebars · GmailApp · DriveApp

SYSTEMS LOGIC BOM/MRP

modeling · state-machine workflow design · relational data design · input validation

ANALYTICS

Google Looker Studio · demand forecasting · inventory health scoring · SQL (intermediate) · Excel/Sheets (advanced)

BUSINESS OPERATIONS

ROI evaluation · stakeholder management · financial operations · process optimization

EDUCATION & CERTIFICATION

Fullstack Data Analytics Program**2023**RevoU ([Certificate](#))**Diploma III, Audio Engineering & Production Management (Film, Video & TV)****2021**

SAE Institute Jakarta

Betriebswirtschaftslehre (Business Management)**2015 — 2017**

FH Aachen

LANGUAGES

Bahasa Indonesia (Native) · English (Fluent) · German (Intermediate)
